RESEARCH INTERESTS

Moving from 3D vision and generative 3D (NeRF, 3D Gaussian Splatting) toward robot learning: (1) unified, flexible interfaces that let existing robot policies take in new sensing modalities such as vision, touch, and sound; (2) robots that continually improve themselves after deployment.

EXPERIENCE

- **Google** – *Software Engineer, Pixel Camera Team* Sep. 2025 – Present
Building on-device perception for computational photography. Mentoring an intern on real-time camera composition control driven by LLM-generated state machines.
- **CompPhoto Lab, NYCU** – *Research Assistant and System Administrator* Aug. 2023 – Present
Advised by Prof. Yu-Lun Liu. Working on 3D scene synthesis, generative models for vision, and embodied AI, with a focus on NeRF, 3D Gaussian Splatting, and vision-language navigation. Led Skyfall-GS (ECCV 2026), which synthesizes immersive 3D urban scenes from satellite imagery. Currently working on interfacing pretrained robot policies with new sensor modalities.
- **Google** – *Software Engineering Intern, Pixel Camera Team* Jun. 2024 – Sep. 2024
Brought the Segment Anything Model (SAM) to mobile devices by distilling it into a lightweight MobileNetV4, with only a 4% performance drop and 20 ms latency (8x faster) on a mobile TPU.
- **IT Center of CS Department, NYCU** – *Teaching Assistant, WWW and System Group* Jul. 2022 – Jun. 2025
Built the backend of the department's TA contact information system, including database schema design, RESTful APIs, and API documentation, following a merge-request and CI/CD workflow.
- **Microsoft** – *Research & Development Intern, Bing Geocoding* Sep. 2023 – Jun. 2024
Extended a backend component to support a new data format with dashboard visualization; validated the DeepCAL address-parsing model and improved its training pipeline.
- **Appier** – *Backend Engineer Summer Intern* Jul. 2023 – Sep. 2023
Built a system that automatically computes and visualizes per-customer, per-feature cloud costs, replacing manual estimation and achieving a 7200x speedup; gathered requirements from PMs and sales.
